

## Practice Quiz: Simple Tests

TOTAL POINTS 5

1. You can verify that software code behaves correctly using test \_\_\_\_.

1 point

- ☒ Cases
- ☐ Loops
- ☐ Arguments
- ☐ Functions

2. What is the most basic way of testing a script?

1 point

- ☐ Codifying tests into the software.
- ☐ Write code to do the tests.
- ☐ Let a bug slip through.
- ☒ Different parameters with expected results.

3. When a test is codified into its own software, what kind of test is it?

1 point

- ☐ Unit test
- ☐ Integration test
- ☒ Automatic test
- ☐ Sanity testing

4. Using \_\_\_\_ simplifies the testing process, allowing us to verify the program's behavior repeatedly with many possible values.

1 point

- ☐ integration tests
- ☒ test cases
- ☐ test-driven development
- ☐ interpreter

5. The more complex our code becomes, the more value the use of \_\_\_\_ provides in managing errors.

1 point

- ☐ loops
- ☐ functions
- ☐ parameters
- ☒ software testing
